**May 7, 2014 (Wednesday)**  
**Hong Kong Convention & Exhibition Centre**

Organizers:   

Co-organizer:     

## PANELISTS SPOTLIGHT - Lili Pan & Samson Lee

**Lili Pan, Founder, Managing Director, L GEES Limited**

Lili Pan has been working on LEED projects since 2008, and provided LEED consultant services for many landmark projects in East Asia. She has practiced 'life cycle energy performance quality assurance' in those projects through energy modeling, building commissioning/retro commissioning and measurement & verification.

As an author of several papers and publications, including 'Commissioning requirement shall be incorporated into China Green Building Rating system', published at IC-GEEB, Beijing, Lili is actively engaged in green building research. She is also a PhD candidate at Cardiff University with research topic related to green building performance verification.

Ms. Lili Pan is the first and so far the only Emerging Professional awarded by USGBC in Greater China region. In 2013, she received USGBC 'LEED in Motion' interview as the sole representative of LEED International Round Table Members which is constituted by LEED APs from 30 countries.

**Samson Lee, Vice President, Facilities Operations - Asia, AllianceBernstein Hong Kong Limited**

Samson is currently engaged in the position as Operations Vice President with AllianceBernstein Hong Kong Limited (head quartered in New York) to direct the development and coordination of facilities operations throughout Asia to meet organizational goals, which involves short and long term planning and implementation whereas meeting corporate needs and objectives, adhering to budget and schedule requirements.

His background is building services engineering and he brought to the company with 20+ years of working experience with a variety of natures including consultancy, operations & maintenance, project & contracting management and facility management.

Samson has also been working for 3 FM service providers namely: Citex Vigers as Technical Manager with key responsibilities on technical support to the FM team; Johnson Controls as FM Solutions Manager supporting the Asia Pacific region on all operations and business development aspects; and Jones Lang LaSalle as Operations Director for North Asia, key functions on operations support, business development and as transition manager for all new accounts' operations model setup.

## Pre- Conference Event: iBMS workshop on April 24, 2014

### Complimentary admission for conference delegates

Governmental regulations and market conditions have ushered in the need for intelligent green buildings which in fact are benefiting from mainstream technological developments. These technologies are providing unique opportunities for organizations to continuously validate operational energy performance and environmental compliance. Open systems advances, the trend of everything connected, cloud services, and advanced dashboards, collectively now make it possible for dissimilar building data to be presented in actionable formats. With iBMS architecture that bring all building systems together and the integrated software applications/suites, building and energy managers can now make timely and educated decisions regarding their energy consumption and building performance. They can baseline and compare their energy and operational performance against established standards or similar building types. New building analytics software and cloud services can now continuously monitor operations to identify problems and prioritize repair actions based on energy and sustainability impact.

### Speaker: Jin Kim, Global Solution Architect, Schneider Electric Asia Pacific Limited

Jin received his Bachelor Degree of Electrical Engineering from Sydney University in 1984. With his long and continuous career centered around controls of diverse kinds ranging from industrial process to HVAC applications, he is currently performing the role of global solution architect within Schneider Electric to bring his experience and insight into the methodology of energy efficiency and efficacy in various environments .

## REGISTER NOW Pre- and Post- Conference Events

### Complimentary admission to pre- and post- conference events:

- Apr 12 Technical Visit to CLP System Control Centre
- Apr 16 Technical Training on Design Practice for Fitting-out Work and Trend for Chiller Development
- May 10 Facility Guided Tour to Hong Kong Exchange Data Centre
- July 11 DatacenterDynamics Conference Hong Kong\*

\*Limited offer. Priorities will be given to data center operators. Successful enrollment will be confirmed separately in May.

### Save up to HK\$ 2,000 to enroll in USGBC LEED AP training course:

- May 24 –25 LEED AP O&M Exam Preparation and LEED EBOM Project Implementation Training  
14 hours in-class training and 4 hours online practice
