

THE HONG KONG CHAPTER OF IFMA SITE VISIT

The Hong Kong International Airport

Friday 06 November 2009

IFMA
The Hong Kong Chapter of IFMA

The HK Chapter of IFMA has arranged a visit to the Hong Kong International Airport (HKIA) and cordially invited our members to join us for this, which will cover a brief introduction to HKIA and the technical aspects in operations and maintenance of the facilities.

The airport opened for commercial operations in 1998, replacing Kai Tak Airport, and is an important regional trans-shipment centre, passenger hub and gateway for destinations in Mainland China (with over 40 destinations) and the rest of Asia. Despite a relatively short history, Hong Kong International Airport has won seven Skytrax World Airport Awards in just ten years.

HKIA also operates one of the world's largest passenger terminal buildings and operates twenty-four hours a day. Flights are operated by roughly 90 airlines to over 150 cities across the globe, and in 2008 it was the 12th busiest airport worldwide in terms of passenger throughput, registering 47,857,746.

In 2008, it was the second busiest airport in the world in terms of cargo traffic, handling 3,660,901 tons of cargo.
