

## Chapter Networking Lunch “West Kowloon Mega Tower”

Due to commence in 2007 as part of the Union Square development at Kowloon MTC station, the International Commerce Centre (ICC) will create a significant addition to the Hong Kong skyline. When paired with Two IFC located on Hong Kong Island it will form a stunning gateway to Victoria Harbour. This 118-floor tower will, at 490 metres above sea level, be Hong Kong's tallest building and the third tallest in the world. It will house a mixed development of office, retail, and residential, with a number of the highest floors being turned into a high class hotel.

For this event, Ms Julia Lau will introduce the Master Planning of this project, and explain how and why it was changed from the original 5 towers to 3 towers. Julia will also introduce the program and some of the design features of ICC.

Register for this event now for an excellent networking opportunity and a chance to understand this fascinating building.
