

# Chapter Network Breakfast 29<sup>th</sup> September 2006 Ultra-Efficient Solutions for HVAC System Operation

**Speaker: Peter Thomsen - Armstrong**

“Frictionless bearings created by magnetic levitation; advanced network solutions integrating multi-system feedback with variable speed input at all levels of the operation”. This sounds like the stuff of science-fiction but it is now available to Facility Managers.

The products in question are a new centrifugal compressor from Danfoss, being built into a number of manufacturer’s products, and advanced networking solutions from the Hartman Company.

A discussion on these advanced solutions by Peter Shiver of Armstrong will be the subject of our first networking breakfast. You should attend this breakfast meeting in order to keep abreast of the significant changes that technology is bringing to our industry

Date: 29<sup>th</sup> September 2006 (Friday)  
Time: 7:30am – 9:00am  
Venue: Dot.Cod Seafood Restaurant & Oyster Bar
